Immunogenetics

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA:

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U. S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0093-7711, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

 Human 40, 62, 312
 Human B-cell development 305
 Human chromosome 19 235
 Human monoclonal antibody 73
- IgA 359
 IgM 73
 IL-5R α 65
 Immature thymocytes 292
 Immunoglobulin 40, 305, 359, 372
 Immunoglobulin superfamily 235
 Infectious disease 222
 $\beta 7$ integrin gene 184
 Interleukin-15 1
 Intrachromosomal 47
- Kappa light chain 40
 Killer cell inhibitory receptor 235
 Kinases 82
 Kinetics 98
 KIR 413
 KRC 32
- Lectin 87
 Leukocyte 222
 LFA-1 354
 Ligands 89
 Linkage 141
 LPS 1
 LTR 16
 Luciferase reporter gene 202
 Lymphocyte antigen 292
 Ly45.1 292
 Ly49 174
- Macrophage 1
 Major histocompatibility complex 420
 Major histocompatibility complex (*Mhc*) 141
 Mapping 402
 Mathematical models 324
 Membrane cofactor protein 363
MHC 16, 76, 82, 161
Mhc 242
MHC 296, 312, 324, 339, 408, 422
MHC class I 208, 260
MHC class II 47, 116, 208, 266, 283, 344
MHC ligands 350
 β_2 -microglobulin 98, 133
 Microsatellite 302
 Monodontidae 242
 Mouse 47, 125, 266, 302
 Mouse transcript 32
 Multigene family 174
 β_2 m mutants 273
- Narwhal 242
 Natural killer cell 235, 413
 Natural killer cells 163, 174
 New 62
 NF- κ B 1
 NK complex 163
 NK receptor 87
NKG2 163
- Organization 22
- P5-1* 402
 Peptide 98
 Peptide binding 324
 Peptide motif 350
 Peptide-binding specificity 56
 Peritoneal B cells 125
 Phosphorylation 184
 Phylogeny 339
 Pockets 350
 Point mutations 144
 Polymorphism 22, 65, 67, 152, 222, 302, 356, 422
 Polymorphism (genetics) 344
 Preferential recombination site 8
 Primates 133
 Promoter 65, 208, 356
 Promoter analysis 116
 Promoter elements 184
 Promoter region 266
 Protection 394
- Rabbit appendix 108
RAD51 108
 Rat 22, 76, 161, 356
 Rat *MHC* 67
 Rat strain monitoring 420
 Rats 344
 Recombinant haplotype 420
 Recombination 312, 413
 Retinoid receptor genes 141
 Retrovirus 16
 RFLP 65
 Rheumatoid arthritis 394
RT1 67
RT1.Ba 161
RT1.M4 420
RT1.S3 76

- SDFI* variant 417
Self-peptides 394
Sequence polymorphism 266
Sequence-based typing 152
Serologic epitope 152
Sheep 359
Silencing 283
Somatic cell hybrid 283
SSLP marker 420
Sturgeon 372
Surrogate light chain 305
- TAP 260
Tapasin 260
T-cell activation 116
T-cell clone 196
T-cell receptor 356
T-cell receptor alpha 253
TcR 196
Testis 363
TFA extraction 350
TGF β 1 184
Thymocyte 354
- Tnfa* 302
Tnfb 302
Transcriptional enhancer 266
TRAV, *TRAJ*, and *TRAC* genes 253
TRAV28S1 62
TUBB 402
Type II transmembrane protein 87
- Variable region sequence 73
VH gene 372
- Zebrafish 141
